Download

JASMINe Design

JASMINe Design is an Eclipse plugin which allows users to design, configure, validate and deploy a distributed middleware architecture.

Version	Linux	Windows	update site	src
1.1.2	x86 (zip)	win32 x86 (zip)		
1.2.1-M2			http://jasmine.ow2.org/design/updatesite	source code

You can also access a nightly build of JASMINe Design through the [nightly update site](#)

JASMINe Monitoring

Version	full installer	full installer (online)	command-line installer
1.2.2	jar		
Older releases	jars		ZIP files

MBeanCmd

MBeanCmd is a tool for probing mbeans on any J2EE server. It can periodically probe mbeans on one or multiple servers and display results on the console, in a file or in a graph. Graphs can also be created using past probes.

Version	bin
2.1.1 (Java version 1.5.x and newer)	jar
2.0.2 (Java version 1.5.x and newer)	jar
1.1.0 (Java version 1.4.x and newer)	jar
Older releases (2.1.x)	jars
Older releases (2.0.x)	jars

JaDOrT (JASMINe Deployment Orchestration Tool)

The JASMINe Deployment Orchestration Tool is a tool for **orchestrating**:

- The **deployment of Java EE applications** on JOnAS 5.x servers. In that case, JaDOrT handles the proper uploading, activation and version management of applications.
- The **deployment OSGi bundles** on JOnAS 5.x servers and OSGi gateways. In that case, JaDOrT handles the proper uploading, activation and deactivation of bundles.
- **Maintenance on a group of JOnAS, Glassfish, JBoss, WebLogic and/or WebSphere servers.** In that case, JaDOrT handles the session and load management. It can be used for any kind of maintenance (application, server, OS, hardware and change of application server).
- **Maintenance of virtual machines.** JaDOrT supports any virtual machine supported by the JASMINe Virtual Machine Management (VMM) API; currently these include **Hyper-V, VMWare** and **Xen**; but also many other thanks to the **LibVirt** support.

It gives the user a **global view on the deployment operation's state**, lets the user **undo or redo any action**, check for errors and **persists all information** for later analysis.

OW2 JASMINe

Version	Main application	Console	Documentation and samples	Source code
1.5.6	Java EE EAR	Java JAR	ZIP file, TGZ file	ZIP file, TGZ file
Older releases	Java EE EARs	Java JARs	ZIP and TGZ files	ZIP and TGZ files

JASMINe VMM (Virtual Machine Management)

JASMINe VMM is an agent that can connect to various Virtual Machine infrastructures and manage virtual machines:

- Supports Hyper-V, VMWare and Xen.
- Can start, stop and migrate virtual machines between hosts.
- Manages logical VM domains and VM image stores.

Once deployed, JASMINe VMM is accessible via JMX.

Version	Binaries and documentation	Source code
0.6.3	ZIP file	SVN
Older releases	ZIP files	

Archived versions

Archived versions of JASMINe and tools can be downloaded [on the forge](#) or [via the OW2 JASMINe Maven repository](#).
